The Ministry Fund Q3 2024 Commentary

After several quarters of anticipation, the Federal Reserve lowered its key overnight borrowing rate by 50 basis points. It was the first interest rate cut since 2020 and signals a shift in monetary policy to stimulate the economy. Equities markets saw significant recoveries, especially sectors hit hard by high interest rates. The fixed income market recovered as international central banks' signals led to expectations of aggressive growth stances.

The Ministry Fund increased 6.55% in the third quarter of 2024 and is up 10.34% year-to-date.

The Fund is tracking well ahead of its stated objective of earning 7.5% annually and distributing 4-5%. We are confident our portfolio allocation is optimized by a quality and value tilt as the Federal Reserve shifts its monetary policy. The recent additions of alternative assets will also dampen the effects of future market corrections and lower the volatility of Fund instruments.
